

Asset Management

The perfect overview of assets

Know exactly what assets you have, whose responsibility they are and where each item is. Get an overall picture of each and every device, from acquisition to disposal, all in one place of inquiry.

What does ALVAO Asset Management solve for you?

- Are your IT costs escalating due to resource inefficiencies?
- Are you struggling to prevent and remedy device loss, drift, and theft?
- Are you facing uncertain risk, due to poor asset visibility?

Did any of those questions get a “yes”? Put an end to hunting down, losing things, being unsure. Manage all your operational asset records with one tool, easily and transparently. Get rid of cumbersome spreadsheet records. The system ensures data integrity, security, traceability, and quality. There’s a clear tree structure for easy sorting.

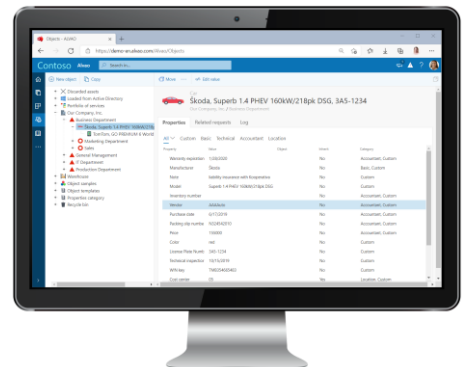

What do customers value?

- Quick and easy asset records
- A clear tree structure for easy sorting
- Quick deployment
- Easy extension of asset records in the ERP system or others
- Auditing HW and SW using IoT, with code scanners, and a web interface for staff
- Meeting international ITIL service delivery standards

Avast management in a company of our size is quite simply a necessity if we are to manage costs effectively.
